

## **Exterior Pest Control Prep Sheet**

***\*Your standard recurring pest control treatment – Building & Maintaining your Barrier***

When this checklist is followed, our treatments work faster and are more effective for longer. If you have any questions or concerns, please call our office at **1-800-454-5837**.

- 1) Provide adequate access by unlocking any gates & securing your pets.
- 2) If your pets may be stressed by our visit, please place them in a secure area or inside.
- 3) Clear any objects (movers, lawn furniture, etc.) that may obstruct the technician from safely accessing the perimeter of your property.
- 4) Do not be alarmed if you notice increased pest activity for up to 7 days after our treatment. Our treatments have a transfer effect that causes movement and allows the pests to carry it back to their nest.
- 5) Try not to miss or delay scheduled treatments. Regularly maintaining your pest barrier is vital to controlling infestations.
