

## **Kilfoam / Kilguard Treatment Prep Sheet**

When this checklist is followed, our top rated “*stay in your home*” termite treatments work faster and last longer. **If you have any questions or concerns, please call your local Kilter branch at 1-800-454-5837.**

### **INTERIOR**

- 1.) Remove items from closets if that is where our technicians access the attic
- 2.) Clear any clutter to allow technicians to freely access treatment areas
- 3.) Secure pets

### **EXTERIOR**

- 4.) Remove any obstacles that would hinder access to the sub structure of your property
- 5.) Clear objects to allow reasonable access to the perimeter walls of the property.

### **GARAGE**

- 6.) Clear enough space to allow for reasonable access to interior walls that are scheduled to be treated
- 7.) Remove or cover any valuables. There is a possibility of dripping, especially if we are treating the ceiling

*Note: Please allow 2-3 hours for treatment to dry before moving everything back into place or uncovering your valuables.*

**Thank you for trusting Kilter Termite & Pest Control. If you have any treatment preparation questions, please contact our office at 1-800-454-5837.**
